

Alan Hull's 6 week Beginner course in detail

Over the years I have built up a solid foundation of material that explains what the stock market is all about and how to approach trading and investing in a logical, methodical manner. All this information is contained in this course.

The syllabus starts with an explanation of how the stock market works plus the basics of charting. The course then takes you on a journey through popular charting techniques and indicators, risk management, methodology of 3 different trading systems and finally the very important subject of trading psychology. Plus you will have access to e-mail support throughout the entire course and receive my Breakout, ActVest & Blue Chip Reports.
